# Transparency Report 2024

Parship ❤

Foreword

Parship is the dating app for singles who are looking for someone who is truly right for them. We have been pioneers in online dating for more than 20 years. We are passionate about bringing people with similar preferences, interests, and personalities together. We're not just about setting up inspiring dates and making connections last – we help forge strong relationships, bring couples together, and start families. The work we do is based on a matching process that's scientifically and psychologically proven to deliver results. It uses a detailed questionnaire to identify personality traits relevant to relationships, and then compares the results with those of other members to show how well two people are suited to each other. Research has demonstrated that relationships which began on Parship are highly likely to be long-lasting and fulfilling (cf. Parship Couples Study 2021).

We are dedicated to providing our members with a reliable and secure service to facilitate a successful and enjoyable search for a partner. We are committed to keeping people who might use our platform for disingenuous reasons out and ensuring that our platform contains no illegal or inappropriate content – and have been doing so for more than 20 years.

In this report, we show how our security teams utilize content moderation to consistently meet our high standards of functionality and security for our service and the protection of our members at all times, and ensure that content is moderated appropriately. We also outline how we comply with the requirements of the Digital Services Act.

This first report covers the **reporting period from February 17, 2024, to December 31, 2024.** We deliberately chose this shorter reporting period so that our reports will span full calendar years starting from This report serves to fulfill the transparency requirements of Article 15 of the Digital Services Act (Regulation (EU) 2022/2065). Pursuant to the Act, providers of intermediary services are required to make clear, understandable reports on the content moderation they have performed during the relevant period publicly available at least once a year – in a machine-readable format and in an easily accessible manner.

On November 4, 2024, the European Commission issued Implementing Regulation C/2024/7005 final. It contains details on the implementation of the transparency requirements.

By issuing this report and, in particular, the annex to this report, we comply with these transparency requirements as laid out in Article 15 DSA and the aforementioned implementing regulation. In accordance with this implementing regulation, the report for the period from February 17, 2024, to December 31, 2024, may be prepared according to Regulation (EU) 2022/2065. However, starting July 1, 2025, reports must be prepared using the templates in Annex I of the Implementing Regulation (see Annex 2 of the Implementing Regulation).

This transparency report for Parship uses the template from the draft of the European Commission, which was used for the feedback consultations. Because the Implementing Regulation was adopted later, on November 4, 2024, we prepared our first transparency report based on the draft requirements. Due to the transitional period in accordance with the Implementing Regulation, we consider this to be permissible for the year 2024. Starting January 1, 2025, our reports will comply with the final version of the Implementing Regulation template.

This transparency report is divided into chapters. The first chapter contains general information about our moderation and illegal and inappropriate content. The second chapter describes our content moderation processes. Finally, the third chapter contains the quantitative and qualitative information required by the template provided in the draft of the Implementing Regulation.

Naturally, we also provide the qualitative and quantitative information as required by the template for download in CSV format.

General information about moderation at Parship:

What types of problematic content do we moderate?

We want our customers to always feel comfortable and safe when using our service. This ensures that they will have the best possible environment for finding the right person for them. Hence, we have created Community Guidelines that provide rules for interaction on our platform. They also form part of our Terms and Conditions (T&C), which all Parship users agree to when registering a profile, regardless of whether their membership is free or paid.

We want Parship users to experience our services as a place for trusted interactions. Our platform should offer users unlimited opportunities to present themselves to other users in a way that reflects their personality, thereby enabling them to have genuine interactions and authentic dating experiences. This of course includes being able to communicate openly and express their own opinion. Free and unfettered communication among users is key to our platform and also our highest priority. This applies both to profile information and chats. Users can share photos, text, chat messages, or other information ("content") on our platform via their profile or in chats, for example.

It is essential that users conduct themselves and communicate in a manner that is both fair and legal. A user's right to express their opinion, themselves, and their personality ends where it infringes on the rights of others or is illegal. In addition, there are general rules of

conduct that we, as a platform provider, uphold for a fair dating experience. Therefore, the following applies: We do not tolerate illegal or inappropriate content. We will moderate any content that is deemed illegal or inappropriate in accordance with applicable laws, the Terms and Conditions, and the Community Guidelines. In doing so, we shall – where necessary and appropriate – exercise our right to delete content, such as photos or text, and to partially or completely block or exclude users. This is initiated via reports that users can submit, or if we, as the platform operator, become aware of illegal or inappropriate content via our own measures.

As a platform operator, we are aware of our responsibilities and are committed to making decisions that are careful, objective, commensurate, and free from arbitrariness, and which take into consideration all circumstances of each individual case. In our decisions, we take into account the conflicting interests and fundamental rights of our users. All decisions are thoroughly justified, and all affected users are entitled to lodge a complaint with us.

Please find below some examples of content that contravenes the Community Guidelines on Parship. These Community Guidelines are available on our website for your reference at any time.

Hate speech, discrimination, defamation

Hate has no place on our dating platform. We do not condone content that incites or displays violence or hatred against individuals or identifiable or specific groups based on characteristics such as ethnicity, religion, disability, health status, age, nationality, sexual orientation, gender, gender identity, caste, immigration status, or similar characteristics or attributes associated with systematic discrimination or exclusion.

Freedom of expression and tolerance are among the most important fundamental rights and freedoms – and which we uphold on our platform. However, freedom of expression and tolerance have limits when content is racist and discriminating, offensive or humiliating, defamatory, threatening, denigrates a religious belief, or constitutes libel.

Inappropriate behavior and language, intimidation, bullying, stalking

All users must respect the wishes of other users. Persistent harassment of other users or encouraging others to do so is prohibited. This also applies to attempts at bullying, persistent harassment, stalking, or intimidating others, all of which are strictly prohibited on our platform. Content that is coercive or involves blackmail is prohibited.

Protection of minors

Users must be at least 18 years of age to use our platform. Any use of our platform by minors is prohibited. Our service and accompanying advertising measures are explicitly not aimed at underage customers, and our intention is never to target underage groups in the distribution of our advertising materials and campaigns. Furthermore, the full use of all contact options offered by Parship is only possible with a paid membership. Content (particularly images) that depicts minors or children (under 18 years of age) is prohibited on our platform. This also applies to users who wish to show images of their own children, and even if a user has permission to share these images.

Sexually inappropriate content/ (child) pornography/depictions of abuse

We are committed to providing our users with a pleasant dating experience. Therefore, pornographic and sexualized content is not permitted on our platform. The same applies to offensive or vulgar content, even if it does not depict any pornographic or sexualized content. Any content that sexualizes or promotes or glorifies the sexual exploitation of children or minors (persons under the age of 18) is also strictly prohibited. Should we become aware of such content, we shall immediately inform the relevant government authorities, in particular the criminal and public safety authorities, of this content and behavior in accordance with the provisions of Art. 18 DSA.

Endangering public safety/ Depiction of unsafe/prohibited products

All content that involves dangerous activities or products is prohibited on our platform. Such content is wholly unrelated to a dating experience. We do not tolerate content on our dating platform that involves illegal or inappropriate goods and services, prostitution, or gambling.

Violence

Our platform aims to provide a positive dating experience. Any form of violence or depiction of violence is therefore prohibited. Content depicting violence against humans, human-like beings (e.g., computer-generated characters), or animals is not permitted.

Communicating a desire for physical harm, death, or illness to a user, other people, or an identifiable group is also strictly prohibited. Advertising, inciting, or encouraging suicide or self-harm is also not permitted. In such cases, we shall also inform the relevant authorities of such incidents in accordance with the provisions of Art. 18 DSA.

Fake profiles, misleading profile information/ profile quality

Fraudulent behavior and fraudulent content are not permitted on our platform. In particular, this includes disseminating content intended to mislead other users by presenting them with false information. Any deception of other users with the aim of causing them to believe in a falsehood by furnishing incorrect facts — thereby gaining an advantage (which does not necessarily have to be of a monetary nature) in their search for a partner or any other advantage — shall be considered inappropriate. This prohibition applies both to bots, which are not permitted on our platform, as well as to individuals, i.e. users.

This prohibition includes, but is not limited to, impersonating someone else and providing false information, such as creating multiple profiles, creating a single "fake profile," or providing false information about a user.

Profile pictures and texts must be appropriate. The profile picture must provide other users with an authentic impression of the user's appearance in order to allow for a satisfactory dating experience. Texts must give other users an authentic and realistic impression of the personality of the person who created the profile.

Attempted fraud: Identity fraud, fraudulent behavior, misuse

It goes without saying that monetary fraud against our members is strictly prohibited, e.g. by creating multiple profiles or a single "fake profile," providing false information about a user, or pretending to be in financial distress for the purpose of obtaining monetary payments or other benefits (also called "scams", "love scams" or "marriage fraud").

Data protection violations/IT security

Fair communication on our platform is only possible if the privacy and data protection of other users or persons is safeguarded at all times.

Any behavior or attempts by users or bots that are liable to jeopardize the IT security of our platform or the security of our users' data are strictly prohibited. The security of our users' data is our top priority.

Advertising, spam, copyright infringement

Our platform is designed to facilitate communication for the purpose of dating. The use of our platform for any other purposes is prohibited. Any form of advertising and solicitation for products, services, or other platforms or companies are strictly prohibited.

Every user must have authorization to use or publish the relevant content. In particular, content must not infringe upon the copyrights and other industrial property rights of third parties. This includes, among other things, copyright, the protection of trade secrets, patent rights, and trademark rights. The use of this content may be lawful if, among other things, the rightsholders have consented to it and the user is able to prove this in cases of doubt.

Our content moderation

In this chapter, we describe our content moderation processes, i.e., how we deal with inappropriate and illegal content. Inappropriate and/or illegal content will always be deleted. Furthermore, users responsible for posting such content will – depending on the severity and frequency of the offense – be warned or have their accounts disabled. The key standards that guide our actions are, in particular, our Community Guidelines, applicable laws, fundamental rights, and a case-by-case commensurability assessment. Our Customer Care team becomes aware of such inappropriate and illegal content in various ways.

We usually gain knowledge of inappropriate and illegal content via the reporting channels that we provide. Furthermore, we also carry out moderation on our own initiative.

Our reporting channels

We have always facilitated the reporting of inappropriate and illegal content by our users. To access this function, users simply click on the designated report button, which can be found in various locations within our app and on our website. Upon receiving a report, our Customer Care team reviews it and the information it contains thoroughly and carefully in accordance with applicable laws, free of arbitrariness, and objectively. Our entire procedure is based on the provisions of Art. 16 ff. DSA.

Our in-house moderation

Furthermore, we carry out in-house moderation to prevent inappropriate and illegal content.

1. Summary of content moderation carried out by providers on their own initiative

Parship uses a comprehensive monitoring system that allows us to swiftly identify suspicious profiles and illegal or inappropriate content. Our systems can quickly detect and respond to patterns and trends in romance scamming and other types of content that violate our Community Guidelines in other ways. For instance, our security procedures are designed to automatically detect suspicious registration or messaging activity. They are continuously trained, including on learning how to quickly detect changes in methods and strategies. In addition to automated monitoring, regular in-person exchanges between the product development, customer care, and business intelligence departments ensure the full integration of our measures.

To ensure a dating experience that complies with applicable laws and our Community Guidelines, we take a variety of additional measures to actively protect our members.

Automated profile verification is used as part of our security checks. This enables us to examine every newly created profile for possible misuse of our platform. In order to identify suspicious activity on Parship, we constantly monitor a combination of profile content and user behavior.

When a new member registers on our platform, or an existing member updates their profile, the content is automatically compared to other data stored in a database of anonymous information we have collected about fake profiles, bots, and similar issues. If something out of the ordinary is discovered, we conduct a more thorough review based on the evidence that led to it. Our security systems automatically examine e.g. free text entries and profile pictures to immediately identify illegal and inappropriate content (as listed in Chapter 1). They then forward this content to Customer Care for manual review and prevent them from being published in the event of a violation of our Community Guidelines. For details on the review of free text and photos, see sections 5, 6, and 7.

In the event of serious or repeated violations of our Community Guidelines, we reserve the right to disable profiles temporarily or permanently. If a member violates our Community Guidelines, for example, if we become aware of offensive comments in messages to other members, or if they misuse our "Report profile" function, this may result in a seven-day suspension of the user profile. Repeated misconduct may result in their profiles being suspended for 14 or 28 days or even a complete exclusion of the profile from our services.

In the event of danger to life and limb, we report incidents on our platform to the relevant authorities in accordance with the provisions of the Digital Services Act. In certain very specific cases, we contact the German Federal Criminal Police Office: in cases of depictions of abuse of minors ("child pornography"), the threat of terrorism, human trafficking, or suicide threats.

If required and legally permissible, we will furnish pertinent information to law enforcement agencies and the police for the purpose of clarifying the incidents. Upon request, we also provide affected users with addresses of counseling centers. In general: When an incident with criminal relevance occurs, we take the situation very seriously and advise the affected party to report it to the police.

2. Meaningful and clearly presented information about the verification method used

To detect illegal and inappropriate content on our platform, we primarily use comprehensive, automated methods to scan the text and images our members wish to use in their profiles. Our image and text verification systems flag content as soon as it violates our Community Guidelines. Such content is then manually reviewed by Customer Care employees. Details on how these automated tools work are described in Sections 5, 6, and 7.

Furthermore, users can report illegal and inappropriate content to our Customer Care team using the reporting function described in Section 1. They can not only report photos and texts that violate our Community Guidelines, but also share content from one-on-one communications with other users with Customer Care employees. To protect the privacy of those involved, content from such conversations cannot be automatically reviewed. Instead, users must report any illegal or inappropriate content shared.

3. Updates to the Terms of Use

Our current Community Guidelines were published and made available to our users in our Terms and Conditions ("T&C") on February 15, 2024, before the Digital Services Act came into effect. The Community Guidelines are clearly linked in the introduction to the T&C. We send the T&C and Community Guidelines to our members when they register and when they sign up for a Premium membership. The last update to Parship's T&C was on September 25, 2024.

4. Measures for training and providing support to persons responsible for content moderation

At Parship, our experienced Customer Care team addresses our members' concerns every day. New employees receive 30 days of "basic training" to prepare them thoroughly for their work. Five days of the training program are devoted to in-depth content moderation and security training. This training familiarizes employees with the technical systems used and also provides on-the-job training.

After the basic training, there are regular refresher courses on changes or innovations to our platform. Additional training is also provided as needed. As part of "Quality Hours," each employee receives continuous individual quality feedback sessions. During these sessions, the handling of cases relating to content moderation or security is reviewed. If necessary, follow-up training is scheduled. Additionally, internal debriefings and retrospectives help ensure the quality of our Customer Care team, even in critical cases.

5. Summary of the use of automated means for the purpose of content moderation
6. Qualitative description of automated means
7. Specification of the exact purposes for which automated means are to be used

To secure our platform, we employ a variety of mechanisms that combine automated and manual checks. For instance, this approach is used when reviewing photos and free text in member profiles.

Image review and approval

Photos uploaded to our platform are subject to extensive automatic and manual image review. Every photo that a member wishes to add to their profile first undergoes an automated review process. Our system checks photos for violations of our Community Guidelines:

- ❤ The number of faces in the photo: Only one person is permitted.
- ❤ Whether there are children in the photo: Persons under the age of 18 must not be visible.
- ❤ Whether QR codes, text, links, phone numbers, or email addresses are visible in the image.
- ❤ Whether nudity in the form of private parts is visible.

Images that clearly comply with our Community Guidelines are automatically approved and can be used in profiles.

All other photos are forwarded to our Customer Care team after the automated check for manual review. At this point, qualified employees decide whether or not the publication of the images in the profile is in line with our Community Guidelines.

Review of free text entries

Members have the option to add free text entries to their profile, thereby personalizing and enriching their online presence. Since the free text is created by the members themselves, it is considered user-generated content. We check to see whether these texts comply with our Community Guidelines.

The check is semi-automated and utilizes terminology and character strings from a block list, which is routinely reviewed, expanded, and adapted. The list includes swear words, components used in contact information (URL markers, @...), but also e.g. text passages that, based on our many years of experience, are frequently used by users.

All free text undergoes automatic verification after it is entered. If there is no obvious violation via the use of stop words, the text is automatically approved. On the other hand, if it is flagged by a filter, the text is manually evaluated by an employee and subsequently rejected or approved. The member will then be informed in accordance with the provisions of the Digital Services Act. During a review, the text is not visible to others.

We continuously work to identify and prevent fraudulent behavior, illegal and inappropriate content, and new trends in this area. We strive to do so in a timely fashion and block the offending users. To this end, a comprehensive set of rules and regular update routines have been put in place. For example, we disable suspicious profiles that have been banned from our services in the past as quickly as possible. For one, we closely monitor access to our platform from geographic

regions outside our core markets and respond accordingly. Through close collaboration with various departments across the company, we continuously improve our existing processes. This allows us to ensure the consistently high quality and detection rate of our security tools.

8. Protective measures for the use of automated means

If the number of profiles incorrectly attributed to unwanted content increases, Customer Care will promptly notify the relevant business intelligence team to review and optimize the automatic detection process. This also applies if there is an increase in the number of profiles that are not automatically detected and also do not comply with our Community Guidelines. In addition, a dashboard shows the current trends. Developments in the figures is reviewed at regular expert meetings.

The responsible staff members will adjust the automated image approval process in the event that incorrectly approved photos come to the attention of the Customer Care team. This includes photos containing personal contact details, photos showing more than one recognizable person, and photos depicting (almost full) nudity.

Text approval uses filters to check profiles for certain words, numbers, and character strings and marks them in red for better focus during manual approval. If there are too many or irrelevant markings, the responsible filter (usually a regular expression) is adjusted by Customer Care staff. Customer Care proceeds in the same way for incorrectly approved content that should have been flagged by the filter.

Moreover, we constantly appeal to our members to take personal responsibility:

Other ways in which Parship users can protect themselves

In addition to our Community Guidelines, we have positioned the "Safety" section prominently on our website to make our members aware of safety and security issues. On this subpage, we provide our customers with comprehensive tips and advice on the topic of "Staying safe when looking for a partner online" with just a click of a button. For example, it provides them with advice on how to handle their personal data, how to verify if a contact is genuine, and what potential risks exist when meeting someone outside our platform for the first time. On this page, as well as on this page for Austria, we provide detailed information on the typical behavior of romance scammers and how our members should respond if they suspect something.

All members also receive an email on the topic of "Safe dating" after registering with Parship. This email provides information about Parship's security measures and basic rules for safely meeting people online, worry-free. We also remind members of this topic again after they purchase a paid membership.

We utilize a two-step registration process known as double opt-in: Members who register with Parship for the first time must verify their email address via a confirmation link. Only then can they complete their Parship profile. This prevents the misuse of email addresses and unauthorized registration by third parties.

Another security feature is voluntary verification: A small icon on the profile indicates to other users that the respective member has identified themselves to us via the use of their cellphone number.

With two-factor authentication, members can further protect their profile from unauthorized access. If a user logs in to Parship from an unknown browser or mobile device, they will be asked to confirm their login with an additional login code.

We have also installed a "Report profile" button. This feature enables all members to swiftly and easily report suspicious, dubious, illegal, or inappropriate profiles and content. Our trained Customer Care staff immediately review these in accordance with data protection regulations for violations of our Terms and Conditions, Community Guidelines, and applicable law. Depending on the severity of the violation, the text and/or image will be deleted and/or the profile will be disabled. Further steps may be taken as well.

Further information on security and safety at Parship is always available on this page.

Qualitative and quantitative information in accordance with the template of the European Commission (from the draft stage)

As a provider of intermediary services, we are required to publish a transparency report in accordance with Art. 15 DSA. The present document complies with this requirement. The reporting period is from **February 17, 2024, to December 31, 2024. The transparency report follows the template provided in** the draft of the Implementing Regulation. The transparency report, which adheres to the aforementioned template, is also available in CSV format.

1. The first tab of the table contains general information about us and the reporting period.
2. The second tab ("2_categories_names") lists the categories of illegal and inappropriate content. The various categories that we provide for users to select from have been allocated in accordance with the template's requirements.
3. The third tab ("3_member_states_orders") lists figures relating to government orders to take action against illegal content.
4. The fourth tab ("4_notices") shows figures relating to measures taken following reports by users via our reporting channels.
5. The fifth tab ("5_own_initiative") contains figures relating to measures taken by our in-house moderation team against illegal content.
6. The sixth tab ("6_overall_figures") provides general figures related to our moderation.

7. Users have the right to lodge a complaint about our moderation measures. The corresponding figures are shown in the seventh tab ("7_internal_complaints").
8. The eighth tab ("8_by_Country_and_language") only applies to very large online platforms, and hence does not apply to us.
9. Tab 9 ("11_statements") contains qualitative information about our moderation.

Tables following the format published in the draft by the European Commission for the reporting period February 17, 2024, to December 31, 2024.

Notes on reading the tables that follow:
Empty   =   category is not applicable
0   =   the category is applicable, but no cases were recorded

The median duration is specified in hours.

1. Information about this report

Applicability	Service	Indicator	Value
All	Parship	Name of the service provider	PE Digital GmbH (Parship)
All	Parship	Date of the publication of the report	04/17/2025
All	Parship	Date of the publication of the latest previous report	(None)

9. Explanations

Applicability	Service	Reporting period	Indicator	Value
All	Parship	02/17/2024 – 12/31/2024	Summary of the content moderation engaged in at the providers' own initiative	Review of all photos uploaded to the profile, all free text entries stored in the profile, and review of the profiles created for fraudulent activity.
All	Parship	02/17/2024 – 12/31/2024	Meaningful and comprehensible information regarding the detection method used	Photos uploaded to our platform are subject to extensive automatic and manual image review. Every photo that a member wishes to add to their profile first undergoes an automated review process. Our system checks photos for violations of our Community Guidelines: Images that clearly comply with our Community Guidelines are automatically approved and can be used in profiles. Photos which cannot be judged with 100% certainty are reviewed manually. Text approval uses filters (usually a regular expression) to check profiles for certain words, numbers, and character strings and marks them in red for better focus during manual approval. Texts that are not flagged by a filter are automatically approved. All texts with markings are reviewed by the Customer Care team. Fraudulent behavior, illegal and inappropriate content, and new "trends" in the field of fraud detection are automatically detected in real time, suppressed, and the corresponding users are excluded from the service. To this end, a comprehensive set of rules and regular update routines have been put in place. For example, we identify suspicious profiles that have been banned from our services in the past as quickly as possible, and block them from accessing our platform. This also applies e.g. to profiles from geographic regions outside our core markets. All profiles that have been excluded from the service as a result of this automated procedure will be followed up with a manual review.
All	Parship	02/17/2024 – 12/31/2024	Updates to the Terms and Conditions	Our current Community Guidelines were published and made available to our users in our Terms and Conditions ("T&C") on February 15, 2024, before the Digital Services Act came into effect. The Community Guidelines are clearly linked in the introduction to the T&C. We send the T&C and Community Guidelines to our members when they register and when they sign up for a Premium membership. The last update to Parship's T&C was on September 25, 2024.
All	Parship	02/17/2024 – 12/31/2024	Measures for training and providing support to persons responsible for content moderation	At Parship, our experienced Customer Care team addresses our members' concerns every day. New employees receive 30 days of "basic training" to prepare them thoroughly for their work. Five days of the training program are devoted to in-depth content moderation and security training. This training familiarizes employees with the technical systems used and also provides on-the-job training. This is supplemented by regular feedback and accompanying spot checks in accordance with ISO 2859-1.
All	Parship	02/17/2024 – 12/31/2024	Summary of the use of automated means for the purpose of content moderation	Automatic checking of free text using filters from a block list (usually regular expressions). Automatic checking of photos for violations of our Community Guidelines: Images that clearly comply with our Community Guidelines are automatically approved Fraudulent behavior, illegal and inappropriate content, and new "trends" in the field of fraud detection are automatically excluded from our services via the use of anonymized pattern recognition.

Applicability	Service	Reporting period	Indicator	Value
All	Parship	02/17/2024 – 12/31/2024	Qualitative description of the automated means	After being entered, all free text is automatically checked using block list filters (usually regular expressions) for specific words, numbers, and character strings. If there is no obvious violation, the text is automatically approved. However, if it is flagged by a filter, the text is marked and forwarded to Customer Care for manual review. Our system checks photos for violations of our Community Guidelines: ♥ The number of faces in the photo: Only one person is permitted. ♥ Whether there are children in the photo: Persons under the age of 18 must not be visible. ♥ Whether QR codes, text, links, phone numbers, or email addresses are visible in the image. ♥ Whether nudity in the form of private parts is visible. Images that clearly comply with our Community Guidelines are automatically approved and can be used in profiles. All inconclusive images will be forwarded to Customer Care for manual review. Fraudulent behavior, illegal and inappropriate content, and new "trends" in the field of fraud detection are automatically identified via anonymized pattern recognition, and the corresponding users are excluded from the service. To this end, a comprehensive set of rules and regular update routines with self-learning have been put in place.
All	Parship	02/17/2024 – 12/31/2024	Specification of the precise purposes to apply automated means	The use of automated means enables faster approval of profile content, provided that it is identified with 100% certainty as being safe. In addition, profiles can be excluded from the services 24 hours a day if clearly fraudulent patterns are detected, thereby protecting our members from fraudsters around the clock.
All	Parship	02/17/2024 – 12/31/2024	Safety/security precautions for the use of automated means	If the number of profiles incorrectly attributed to unwanted content increases, Customer Care will promptly notify the relevant business intelligence team to review and optimize the automatic detection process. This also applies if there is an increase in the number of profiles which are not automatically detected and that do not comply with our Community Guidelines. In addition, a dashboard shows the current trends. Developments in the figures is reviewed at regular expert meetings. The responsible staff members will adjust the automated image approval process in the event that incorrectly approved photos come to the attention of the Customer Care team. This includes photos containing personal contact details, photos showing more than one recognizable person, and photos depicting (almost full) nudity. Text approval uses filters to check profiles for certain words, numbers, and character strings and marks them in red for better focus during manual approval. If there are too many or irrelevant markings, the responsible filter (usually a regular expression) is adjusted by Customer Care staff. Customer Care proceeds in the same way for incorrectly approved content that should have been flagged by the filter.
